# CHAPTER 1

## INTRODUCTION

Uncertainty is an unavoidable natural part of our life. Everyone feels it on a daily basis. One can never be sure of what the future might have in store for us. The best way to handle them is to learn techniques that help us face and live with it. Hence, it is crucial to safeguard our savings to handle any such uncertainty that life would throw at us. In today's world, investments are the clever way to safeguard our savings and also maximize our profits. Though all investments might not be risk-free, some are really worth the risk!.

*Fig 1 Investing to safeguard our future*

One such investment is the 'Stock investment'. Though volatile in nature, they provide the highest returns in the market. Stock market/Share market is the aggregation of buyers and sellers of stocks(also called shares), which represents ownership claims on buisnesses.

So basically, they are places where a person can invest money and hope to make a profit out of it. Buying shares of a company, makes the person a part owner of that respective company.

Even though stocks are an excellent investment platform, many are terrified of it either due to the lack of financial knowledge or either due to the risk involved.

## 1.1 MOTIVATION OF PROJECT

Safeguarding our savings and making smart investments are really essential to ensure that we are well prepared to handle the uncertainities in our life.

This 'Understanding stocks! :: Stock Market for beginners' is an attempt to give a detailed explanation on Investment, its types and an elaborated explanation on stock markets and its working in layman terms.

*Fig 1.1.1 Understanding investments and stock market*

The main motivation of the project is to provide knowledge on investments and stock

market and their working in layman terms for a beginner or an amateur interested in investments. The project also aims to reduce the difficulties and confusion regarding stock markets and its investment trends.

## 1.2 PROBLEM DEFINITION AND STATEMENT

To start investing in stock markets a basic understanding of the investment methods and the basics of what stocks are and how the market functions.

- <u>Problem statement:</u>
  - Most of us are scared of stock market trading and consider it a very dangerous and volatile investment method because of our lack of knowledge regarding the stock market investments and their trends.
  - The various investment options and explanation of stock markets in an easy, understandable explanation is not found easily.

# CHAPTER 2

# SYSTEM REQUIREMENTS

## 2.1 HARDWARE REQUIREMENTS:

- Any device that with a browser that would be compatible with HTML5 and CSS and shall comprise the basic components such as:
    - Processor: Any processor above 500 MHz. ex: Intel® core™
    - RAM: 16 GB.
    - Input devices: Standard keyboard and mouse.
    - Output devices: High resolution monitor.

## 2.2 SOFTWARE REQUIREMENTS:

- An operating system that is compatible with HTML5 and CSS. For example: Windows 7/7+, Linux, etc.
- Browser that supports the functionalities of HTML5 and CSS for the execution of code.
- Languages used: HTML5 and CSS.
- Programming platform: Windows
- Editor: Notepad / Notepad++ / NoteTab.

# CHAPTER 3

# SYSTEM DESIGN

## 3.1 MODULES

### 3.11 HTML INTRODUCTION:

- **HTML** stands for HyperText Markup Language. It is used to design web pages using a markup language.
- HTML is the combination of Hypertext and Markup language. Hypertext defines the link between the web pages. A markup language is used to define the text document within tag which defines the structure of web pages.
- HTML is a markup language used by the browser to manipulate text, images, and other content, in order to display it in the required format.

### 3.12 HTML PAGE STRUCTURE:

- **<DOCTYPE! html>:** This is the document type declaration. It declares a document as being an HTML document.
- **<html>:** This is called the HTML root element. All other elements are contained within it.
- **<head>:** The head tag contains the back-end elements for a webpage. Elements within the head aren't visible on the front-end of a webpage.
- **<body>:** The body tag is used to enclose all the visible content of a webpage. In other words, the body content is what the browser will show on the front-end.
- **<title>:** This used to define the title of HTML document. It sets the title in the browser toolbar.

## 3.13 CSS INTRODUCTION:

- CSS stands for Cascading Style Sheets. It is the language for describing the presentation of Web pages, including colours, layout, and fonts, thus making our web pages presentable to the users.
- It describes the look and formatting of a document which is written in a markup language. It provides an additional feature to HTML. It is generally used with HTML to change the style of web pages and user interfaces.
- CSS is designed to make style sheets for the web. It is independent of HTML and can be used with any XML-based markup language.

## 3.14 CSS SELECTORS:

CSS selectors are used to select the content we want to style. Selectors are the part of CSS rule set. CSS selectors select HTML elements according to its id, class, type and attribute.

The 3 different types of selectors in CSS are:

- Element Selector
- ID Selector
- Class Selector

### i. Element Selector:

The element selector in CSS is used to select HTML elements which are required to be styled. In a selector declaration, there is the name of the HTML element and the CSS properties which are to be applied to that element is written inside the curly brackets.

### ii. ID Selector:

The id selector selects the id attribute of an HTML element to select a specific element. The id attribute is the unique identifier in HTML document. An id is always unique within the page so it is chosen to select a single, unique element.

### iii. Class Selector:

The class selector is used to select all elements which belong to a particular class attribute. In order to select the elements with a particular class, use the period (.) character specifying the class name. The class name is mostly used to set the CSS property to a given class.

## 3.2 ARCHITECTURE

### 3.21 PROPOSED SYSTEM:

As mentioned earlier, the project aims to give a better understanding on the basics of investment options and an even detailed explanation on stock market and its functionalities. To make the content more convenient to understand and user-friendly, a customized webpage is developed.

### 3.22 SYSTEM DESIGN:

The unit's front end is the customized webpage where the user would be able to read the specified contents of the investment options and the stock market. The back end of the unit is HTML5 that takes care of the layout and the outlook of the page and CSS that would handle the styling of the webpage.

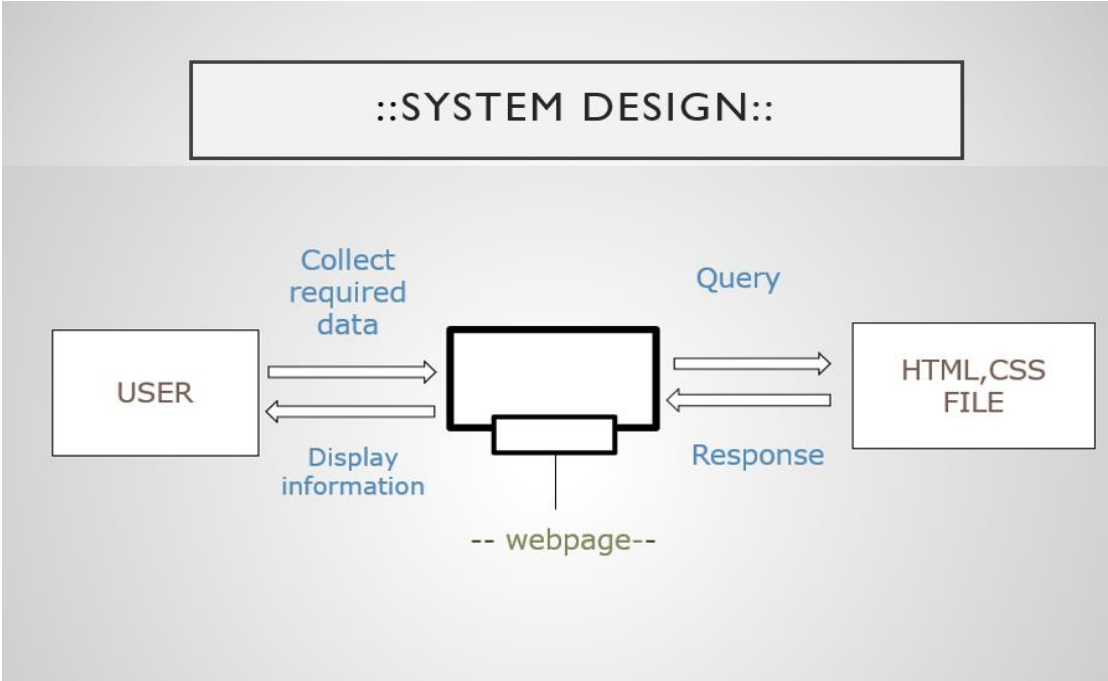

*Fig 3.22.1 The system design of the webpage*

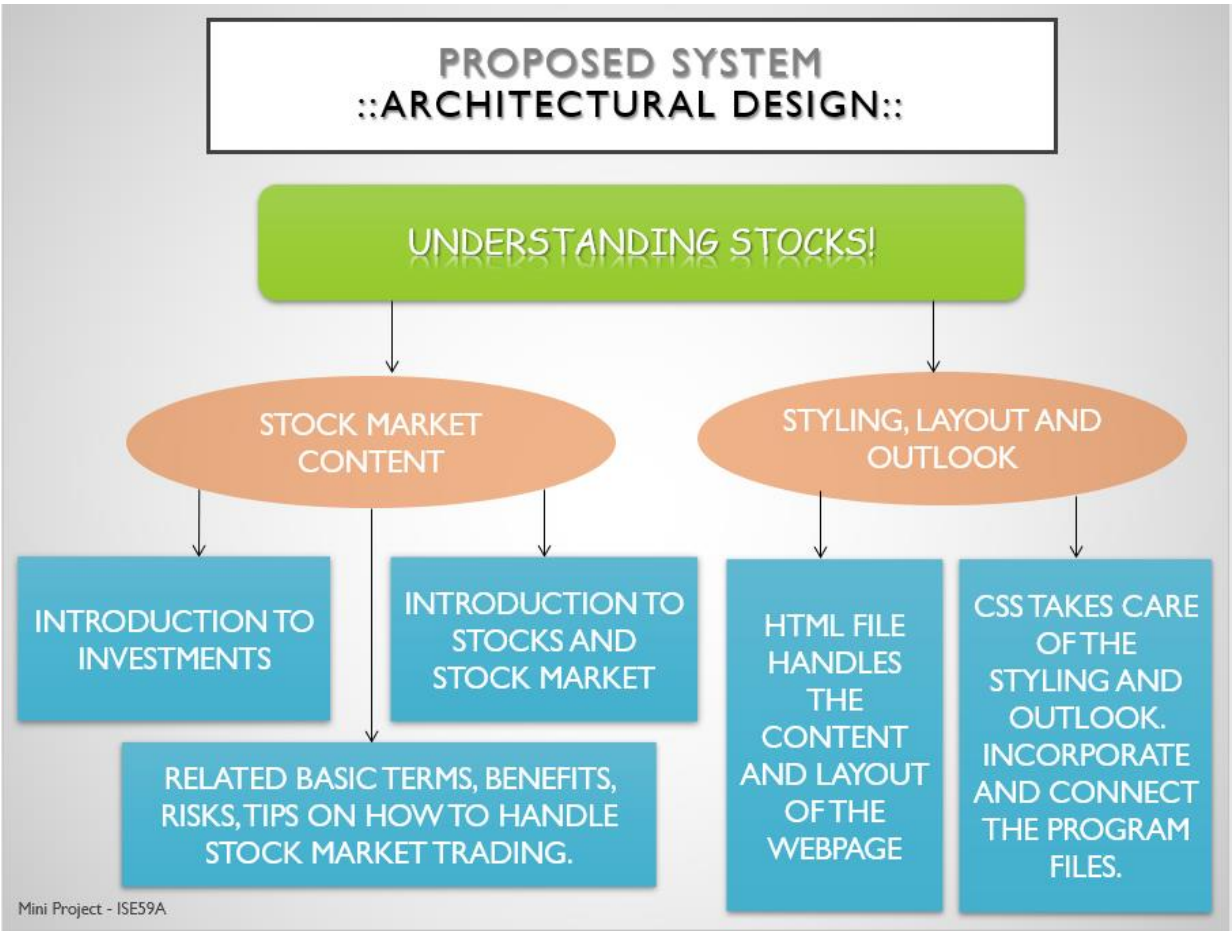
## 3.3 ARCHITECTURAL DESIGN:



## 3.4 CODE AND IMPLEMENTATION:

### 3.41 CODE:

The code is done using HTML5 and CSS languages. The code is basically of two parts:

a. Construction of the webpage and linking the other required widgets to the appropriate contents.
   - This part of the code handles the layout, looks and the personalization of the webpage. It is done using HTML5 and CSS
   - Here, the visual appearance such as the font size and style, color of the text, buttons, selection options, specifications and the messages to be displayed on the webpage can be formatted and designed.

b. Actual content of the webpage that would give an introduction to investments and stocks in layman terms.
   - Here the contents of the webpage would be taken care of.
   - The contents of the webpage would include:
     i. An introduction to investments.
     ii. The various types of investments.
     iii. An introduction to stock and stock markets.
     iv. Basic ground rules, advices and few guidelines on operating with stocks.
     v. Why is it necessary to invest and chose stock markets for investments.

## 3.42 IMPLEMENTATION:

As mentioned above, the languages used here are HTML5 and CSS for developing the customized webpage.

- **HTML FILE:**
  - Steps to define a HTML document and define the title of the webpage:

```html
<!DOCTYPE html>
<html lang="en">

<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="wilih=device-wilih, initial-scale=1.0">
  <link rel="stylesheet" href="style.css">
  <title>UNDERSTAND STOCK MARKET</title>
</head>
```

  - Creation of the body content of the webpage and defining the header part and the navigation bar:

```html
<body>
  <!-- Header -->
  <section id="header">
    <div class="header container">
      <div class="nav-bar">
        <div class="brand">
          <a href="#hero">
            <h1><span>U</span>nderstanding<span> S</span>tocks!</h1>
          </a>
        </div>
        <div class="nav-list">
          <div class="hamburger">
            <div class="bar"></div>
          </div>
          <ul>
            <li><a href="#hero" data-after="Home">Home</a></li>
            <li><a href="#services" data-after="Service">Introduction</a></li>
            <li><a href="#projects" data-after="Projects">Basics</a></li>
            <li><a href="#about" data-after="About">Tips</a></li>
            <li><a href="#contact" data-after="contact">Maintained by</a></li>
          </ul>
        </div>
      </div>
    </div>
  </section>
  <!-- End Header -->
```

- Creating the 'Welcome page':

```
<!-- Hero Section  -->
<section id="hero">
  <div class="hero container">
    <div>
      <h1>Hello, <span></span></h1>
      <h1>Welcome to <span></span></h1>
      <h1>Understanding Stocks! <span></span></h1>
      <a href="#projects" type="button" class="cta">Let's start;)</a>
    </div>
  </div>
</section>
<!-- End Hero Section  -->
```

- Creating the 'Introduction' section:

```
<!-- Service Section -->
<section id="services">
  <div class="services container">
    <div class="service-top">
      <h1 class="section-title"><span>I</span>ntroduction</h1>
      <h1 class="section-content"><span>INVESTMENTS</span></h1><br>
          <h2 class="section-content" ><span>What</span> is Investments?</h2>
          <p>Investment is the employment of funds with the aim of getting return on it. In general terms, investment means the use of money
          in the hope of making more money.
          In finance, investment means the purchase of a financial product or other item of value with an expectation of favorable future
          returns. </p>
          <p>In simple terms, The money you earn is partly spent and the rest saved for meeting future expenses.
          Instead of keeping the savings idle you may like to use savings in order to get return on it in the future.
          This is called Investment.</p>
          <p>Investment of hard earned money is a crucial activity of every human being. Investment is the commitment of funds which have been
          saved from current consumption with the hope that some benefits will be received in future.
          Thus, it is a reward for waiting for money. Savings of the people are invested in assets depending on their risk and return demands.</p>
          <p> Various investment options are available, offering differing risk-reward tradeoffs. An understanding of the core concepts and a
          thorough
          analysis of the options can help an investor create a portfolio that maximizes returns while minimizing risk exposure.</p><br>
          <p style="color: blue;"><i>Why should one invest?</style></i>
          <ul>
```

- Creating 'key financial instruments' section:

```
    with sincere and persistent efforts, you can learn stock market.<br><h2 font color= historic</p>  >
</div>
<br><br><br><br><br><br><br><br>
<h1 class="section-title">Key Financial Instruments<br><span> Traded in Stock market</span></h1>
<div class="service-bottom">

  <div class="service-item">
    <div class="icon"><img src="https://img.icons8.com/bubbles/100/000000/services.png" /></div>
    <h2>Shares/Equity</h2>
    <p>Equities or stocks or shares give you ownership of a company. You can buy or sell shares through a broker.Companies can raise equity
    capital with the help of an IPO by issuing new shares to the public or the existing shareholders can sell their shares to the public.</p>
  </div>
  <div class="service-item">
    <div class="icon"><img src="https://img.icons8.com/bubbles/100/000000/services.png" /></div>
    <h2>Mutual Funds</h2>
    <p>Here, the money is pooled from many investors and then invested in various financial instruments. Investors are referred to as unit
    holders. Profit generated is distributed to unit holders in proportion to the units held by them.<br><br><br></p>
  </div>
  <div class="service-item">
    <div class="icon"><img src="https://img.icons8.com/bubbles/100/000000/services.png" /></div>
    <h2>Bonds</h2>
    <p>These are fixed income instruments also known as debt instruments by which government or a company borrows money from investors at
    an agreed interest rate for a specific tenure. These are less risky when compared to shares.<br><br><br></p>
  </div>
  <div class="service-item">
    <div class="icon"><img src="https://img.icons8.com/bubbles/100/000000/services.png" /></div>
    <h2>Derivatives</h2>
    <p>Derivative is a financial contract whose value is derived from an underlying asset. It can be used to mitigate a number of risks.
    Derivatives include forward, futures, options and swaps.<br><br><br><br><br></p>
  </div>
```

```
      </div>
    </div>
  </div>
</section>
<!-- End Service Section -->
```

- Creating 'Basics of stock market' section:

```
<!-- Projects Section -->
<section id="projects">
  <div class="projects container">
    <div class="projects-header">
      <h1 class="section-title">Share market <span>Basics</span></h1>
    </div>
    <div class="all-projects">
      <div class="project-item">
        <div class="project-info">

          <h2><span>What</span> is stock? </h2><br><br><br><br><br>
          <p>
          <ul>
          <li>Stock is the share in the ownership of the company. Stock represents the claim on the company's assets and earnings.
          In other words, it means, the more the stock, the ownership stake in the company becomes greater.</li>
          <li>The stock is represented by a stock certificate which is a document that proves the ownership in the company.</li>
          <li>Few years ago when the person wanted to buy or sell shares, he/she physically took the certificates to the brokerage firm.
          But now information technology has increased, because of which this stock document is stored electronically.
          Now trading with a click of mouse or a phone call has made transacting easier.</li>
          <li>Another important feature of stock is its limited liability. It means as the owner of the stock, he/she is not responsible
          for the payments of the debts if the company is not able to. Owning stock means even if the company goes bankrupt,
          the owner of the stock will never lose his or her personal assets.</li>
          </ul>
          </p>

        </div>
        <div class="project-img">
          <img src="./img/img-1.png" alt="img">
        </div>
      </div>
      <div class="project-item">
        <div class="project-info">

<h2>Stock market</h2><br><br><br><br><br>
<p>

      </p>
    </div>
    <div class="project-img">
      <img src="./img/img-1.png" alt="img">
    </div>
  </div>
  <div class="project-item">
    <div class="project-info">
      <h2>How to buy stocks?</h2><br><br>
      <p><ol>

      </ol></p>

    </div>
    <div class="project-img">
      <img src="./img/img-1.png" alt="img">
    </div>
  </div>
  <div class="project-item">
    <div class="project-info">
      <h2>How to know when to buy,sell and hold stocks?</h2><br><br><br>
      <p>
      <ul>
```

```
      </ol>
      </ul>
      </p>
    </div>
    <div class="project-img">
      <img src="./img/img-1.png" alt="img">
    </div>
  </div>
  <div class="project-item">
    <div class="project-info">

      <h2>BUYING STOCKS:</h2><br><br><br>
      <p>
      <ul>

      </ol>
      </p>
      </div>
      <div class="project-img">
      <img src="./img/img-1.png" alt="img">
    </div>
      </div>
      <div class="project-item">
    <div class="project-info">
      <h2>SELLING STOCKS:</h2><br>
      <p>
      <ul>

      </ol>
      </p>
    </div>
    <div class="project-img">
      <img src="./img/img-1.png" alt="img">
    </div>
  </div>
  <div class="project-item">
    <div class="project-info">
    <h2>HOLDING STOCKS:</h2><br>
    <p>
    <ul>

        every day. Investors who do this often, lose money.</li>
      </ul>
      </p>
    </div>
      <div class="project-img">
      <img src="./img/img-1.png" alt="img">
      </div>
    </div>
  </div>
</div>
</section>
```

- Creating ‘SHARE MARKET TIPS, RISKS, BENEFITS’ section:

```
<!-- About Section -->
<section id="about">
  <div class="about container">
    <!--<div class="col-left">
      <div class="about-img">
        <img src="./img/img-2.png" alt="img">
      </div>
    </div>-->
    <div class="col-right">
      <h1 class="section-title">Share market<span> Tips</span></h1><br><br><br>
      <!--<h2>Front End Developer</h2>-->
      <h2>

<div class="col-right">
    <h1 class="section-title"><span>Benefits </span>and<span> Risks</span></h1>
        <h2 class="section-content"><span>Benefits of investing in stocks</span></h2>
```

```
        However, in the case of stocks, its much easier because there are several buyers and sellers for each stock.
      </ol></p><br><br>
    <h2 class="section-content"><span>Risks of investing in stocks</span></h2>

                </li>
                </ol>

                </p>

    </div>
    </div>
  </section>
<!-- Contact Section -->
```

- Creating 'MAINTAINED BY' section:

```
<!-- Contact Section -->
<section id="contact">
  <div class="contact container">
    <div>
      <h1 class="section-title">Website <span> maintained by</span></h1><br><br><br><br><br>
      <!--<h1 align="center"><span>Rishitha J</span><br><span>Nityasree S</span></align></h1>-->
    </div>
    <div class="contact-items">
      <div class="contact-item">
      <div class="icon"><img src="https://img.icons8.com/fluency/48/000000/writer-female.png"/></div>
        <div class="contact-info">
          <h1>Name</h1>
          <h2>Rishitha J</h2>
          <h2>Nityasree S</h2>
        </div>
        </div>

      <div class="contact-item">
        <div class="icon"><img src="https://img.icons8.com/bubbles/100/000000/new-post.png" /></div>
        <div class="contact-info">
          <h1>Email</h1>
          <h2>rishitha@gmail.com</h2>
          <h2>nityasree@gmail.com</h2>
        </div>
      </div>
      <br><br>
      <div class="contact-item">
        <div class="icon"><img src="https://img.icons8.com/bubbles/100/000000/map-marker.png" /></div>
        <div class="contact-info">
          <h1>Address</h1>
          <h2>Bangalore, Karnataka, India</h2>
        </div>
      </div>
    </div>
  </div>
</section>
<!-- End Contact Section -->
```

- Creating 'FOOTER' section of the webpage:

```
<!-- Footer -->
<section id="footer">
  <div class="footer container">
    <div class="brand">
      <h1><span>U</span>nderstanding <span> S</span>tocks;)</h1><br><br>
    </div>
    <!--<h2>Your Complete stock Solution</h2>-->
    <div class="social-icon">
      <div class="social-item">
        <a href="#"><img src="https://img.icons8.com/bubbles/100/000000/facebook-new.png" /></a>
      </div>
      <div class="social-item">
        <a href="#"><img src="https://img.icons8.com/bubbles/100/000000/instagram-new.png" /></a>
      </div>
      <div class="social-item">
        <a href="#"><img src="https://img.icons8.com/bubbles/100/000000/twitter.png" /></a>
      </div>
      <div class="social-item">
        <a href="#"><img src="https://img.icons8.com/bubbles/100/000000/behance.png" /></a>
      </div>
    </div>
    <p>Copyright © 2022 Rishitha-Nityasree. All rights reserved</p>
  </div>
</section>
<!-- End Footer -->
```

- Defining the .js script and 'CLOSING' the webpage:

```
  <script src="./app.js"></script>
</body>

</html>
```

## ➢ CSS FILE:

- Importing fonts and defining the basic layout of the webpage:

```
@import 'https://fonts.googleapis.com/css?family=Montserrat:300, 400, 700&display=swap';
* {
    padding: 0;
    margin: 0;
    box-sizing: border-box;
}
html {
    font-size: 10px;
    font-family: 'Montserrat', sans-serif;
    scroll-behavior: smooth;
}
a {
    text-decoration: none;
}
ul{
    font-size: 1.8rem;
    list-style-type: square;
    line-height: 3.5rem;
    font-weight: 1000;
}
ol{
    font-size: 1.8rem;
    line-height: 3.5rem;
    font-weight: 1000;
}
```

- Styling of the class 'CONTAINER':

```
.container {
    min-height: 100vh;
    width: 100%;
    display: flex;
    align-items: center;
    justify-content: center;
}
img {
    height: 100%;
    width: 100%;
    object-fit: cover;
}
p {
    color: black;
    font-size: 1.8rem;
    margin-top: 5px;
    line-height: 3.5rem;
    font-weight: 1000;

    letter-spacing: 0.05rem;
}
```

```
.cta {
    display: inline-block;
    padding: 10px 30px;
    color: white;
    background-color: transparent;
    border: 2px solid crimson;
    font-size: 2rem;
    text-transform: uppercase;
    letter-spacing: 0.1rem;
    margin-top: 30px;
    transition: 0.3s ease;
    transition-property: background-color, color;
}
.cta:hover {
    color: white;
    background-color: crimson;
}
.brand h1 {
    font-size: 3rem;
    text-transform: uppercase;
    color: white;
}
.brand h1 span {
    color: crimson;
}
```

- Styling of the 'HEADER' section:

```
/* Header section */
#header {
    position: fixed;
    z-index: 1000;
    left: 0;
    top: 0;
    width: 100vw;
    height: auto;
}
#header .header {
    min-height: 8vh;
    background-color: rgba(31, 30, 30, 0.24);
    transition: 0.3s ease background-color;
}
#header .nav-bar {
    display: flex;
    align-items: center;
    justify-content: space-between;
    width: 100%;
    height: 100%;
    max-width: 1300px;
    padding: 0 10px;
}
#header .nav-list ul {
    list-style: none;
    position: absolute;
    background-color: rgb(31, 30, 30);
    width: 100vw;
    height: 100vh;
    left: 100%;
    top: 0;
    display: flex;
    flex-direction: column;
    justify-content: center;
```

```
    justify-content: center;
    align-items: center;
    z-index: 1;
    overflow-x: hidden;
    transition: 0.5s ease left;
}
#header .nav-list ul.active {
    left: 0%;
}

    text-transform: uppercase;
}
#services .service-item p {
    color: white;
    text-align: left;
}
/* End Services Section */
```

- Styling of the 'PROJECTS' section:

```
/* Projects section */
#projects .projects {
    flex-direction: column;
    max-width: 1200px;
    min-height: 1200px;
    margin: 0 auto;
    padding: 100px 0;
}
#projects .projects-header h1 {
    margin-bottom: 50px;
    align-items: center;
}
#projects .all-projects {
    display: flex;
    align-items: center;
    justify-content: center;
    flex-direction: column;
    /*min-height: 1500px;*/
}
#projects .project-item {
    display: flex;
    align-items: center;
    justify-content: center;
    flex-direction: column;
    width: 80%;
    margin: 20px auto;
    overflow: hidden;
    border-radius: 10px;
    min-height: 1000px;  /*height of each coloumn of the content box*/
}
#projects .project-info {
    padding: 30px;
    flex-basis: 100%;
    height: 100%;
    display: flex;
```

```
    justify-content: center;
    flex-direction: column;
    background-image: linear-gradient(60deg, #29323c 0%, #485563 100%);
    color: white;
}
#projects .project-info ul{
    list-style-type: disc;
}
#projects .project-info ol{
    list-style-type: lower-roman;
}

#projects .project-info h1 {
    font-size: 4rem;
    font-weight: 500;
}
#projects .project-info h2 {
    font-size: 3rem;
    font-weight: 500;
    margin-top: 10px;
}
#projects .project-info p {
    color: white;
    font-size: 1.8rem;
}
#projects .project-img {
    flex-basis: 80%;
    height: 300px;
    overflow: hidden;
    position: relative;
}
#projects .project-img:after {
    content: '';
```

```
    position: absolute;
    left: 0;
    top: 0;
    height: 100%;
    width: 100%;
    background-image: linear-gradient(60deg, #29323c 0%, #485563 100%);
    opacity: 0.7;
}
#projects .project-img img {
    transition: 0.3s ease transform;
}
#projects .project-item:hover .project-img img {
    transform: scale(1.1);
}
/* End Projects section */
```

- Styling of the 'ABOUT' section:

```
/* About Section */
#about .about {
    flex-direction: column-reverse;
    text-align: center;
    max-width: 1200px;
    margin: 0 auto;
    padding: 100px 20px;
}
#about .col-left {
    width: 250px;
    height: 360px;
}
#about .col-right {
    width: 100%;

    padding: 100px;

}
#about .col-right h2 {
    font-size: 1.8rem;
    font-weight: 500;
    letter-spacing: 0.2rem;
    margin-bottom: 10px;
}
#about .col-right p {
    margin-bottom: 20px;
}
#about .col-right .cta {
    color: black;
    margin-bottom: 50px;
    padding: 10px 20px;
    font-size: 2rem;
}
```

```
#about .col-left .about-img {
    height: 100%;
    width: 100%;
    position: relative;
    border: 10px solid white;
}
#about .col-left .about-img::after {
    content: '';
    position: absolute;
    left: -33px;
    top: 19px;
    height: 98%;
    width: 98%;
    border: 7px solid crimson;
    z-index: -1;
}
#about .section-content h2{
    font-size: 13rem;
}

/* End About Section */
```

- Styling of the 'CONTACT' section:

```
/* contact Section */
#contact .contact {
    flex-direction: column;
    max-width: 1200px;
    margin: 0 auto;
    width: 90%;
}
#contact .contact-items {
    /* max-width: 400px; */
    width: 100%;
}
#contact .contact-item {
    width: 80%;
    padding: 20px;
    text-align: center;
    border-radius: 10px;
    padding: 30px;
    margin: 30px;
    display: flex;
    justify-content: center;
    align-items: center;
    flex-direction: column;
    box-shadow: 0px 0px 18px 0 #0000002c;
    transition: 0.3s ease box-shadow;
}
#contact .contact-item:hover {
    box-shadow: 0px 0px 5px 0 #0000002c;
}
#contact .icon {
    width: 70px;
    margin: 0 auto;
    margin-bottom: 10px;
}

#contact .contact-info h1 {
    font-size: 2.5rem;
    font-weight: 500;
    margin-bottom: 5px;
}
#contact .contact-info h2 {
    font-size: 1.3rem;
    line-height: 2rem;
    font-weight: 500;
}
/*End contact Section */
```

- Styling of the 'FOOTER':

```
/* Footer */
#footer {
    background-image: linear-gradient(60deg, #29323c 0%, #485563 100%);
}
#footer .footer {
    min-height: 200px;
    flex-direction: column;
    padding-top: 50px;
    padding-bottom: 10px;
}
#footer h2 {
    color: white;
    font-weight: 500;
    font-size: 1.8rem;
    letter-spacing: 0.1rem;
    margin-top: 10px;
    margin-bottom: 10px;
}
#footer .social-icon {
    display: flex;
    margin-bottom: 30px;
}
#footer .social-item {
    height: 50px;
    width: 50px;
    margin: 0 5px;
}
#footer .social-item img {
    filter: grayscale(1);
    transition: 0.3s ease filter;
}
#footer .social-item:hover img {
    filter: grayscale(0);
}

#footer p {
    color: white;
    font-size: 1.3rem;
}
/* End Footer */
```

- Styling of the 'KEYFRAMES':

```
/* Keyframes */
@keyframes hamburger_puls {
    0% {
        opacity: 1;
        transform: scale(1);
    }
    100% {
        opacity: 0;
        transform: scale(1.4);
    }
}
@keyframes text_reveal_box {
    50% {
        width: 100%;
        left: 0;
    }
    100% {
        width: 0;
        left: 100%;
    }
}
@keyframes text_reveal {
    100% {
        color: white;
    }
}
@keyframes text_reveal_name {
    100% {
        color: crimson;
        font-weight: 500;
    }
}
/* End Keyframes */
```

# CHAPTER 4

# RESULTS AND DISCUSIONS

## 4.1 RESULTS

### 4.11 EXPECTED RESULT

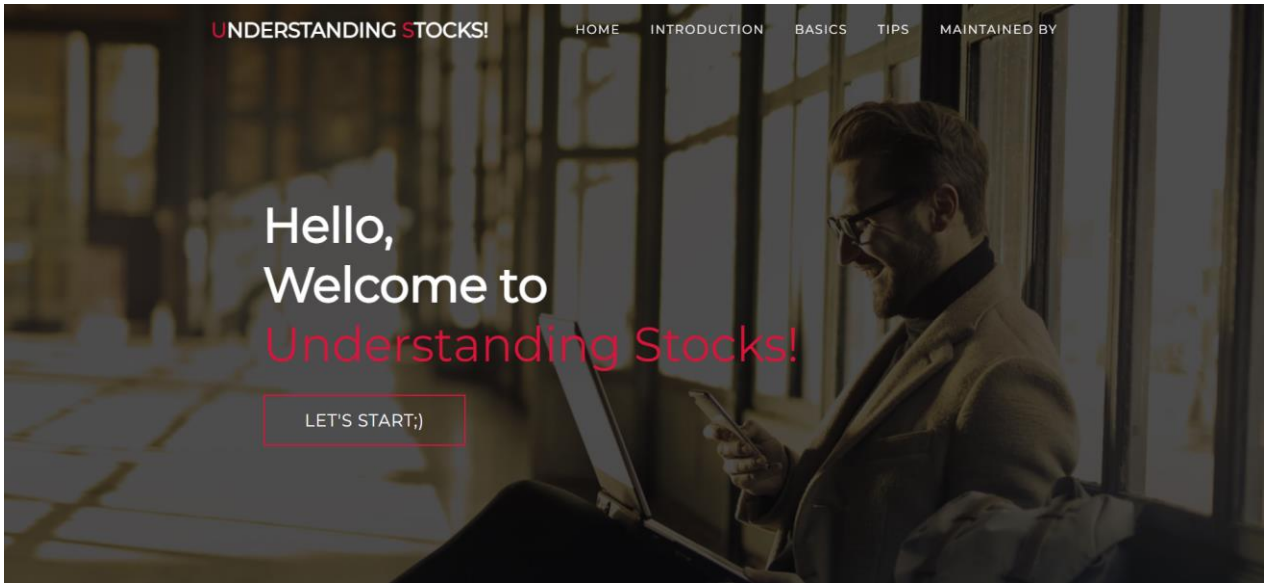
The expected result of the project is a simple customized webpage that would explain Investments and stock market in layman terms that would be easy for a beginner or an amateur to understand easily with minimum efforts.

- ✓ The expected webpage is expected to contain the following sections:
  - i. Welcome page giving the title and navigation bar.
  - ii. Introduction to Investments and its types.
  - iii. Basics of stock market.
  - iv. Share market tips.
  - v. Benefits and risks of stock market.
  - vi. Website maintained by column.
- ✓ The navigation bar of the website is expected to have the following widgets:
  - i. The title of the page: 'UNDERSTANDING STOCKS!'
  - ii. Home.
  - iii. Introduction.
  - iv. Basics
  - v. Tips
  - vi. Maintained by.

## 4.12 FINAL OUTCOME

The final outcome of the project is a customized webpage that provides a clear understanding on the basics of investments, its types and stock markets in detail in terms that would be easily undestandable by a beginner or an amateur interested in investing.

- The screenshots of the webpage are pasted below.
- The welcome page of the website:



This section of the website describes the Welcome page. When the user clicks on the website, this Welcome page will be seen to them. The components of this page are as mentioned below:

- The title, “UNDERSTANDING STOCKS!” will be displayed.
- A welcome statement, “Hello, welcome to Understanding Stocks!” is seen on the screen.
- It has a navigation bar which consists of:
    - Home.
    - Introduction.
    - Basics.
    - Tips.
    - Maintained by.
- Which on selecting will lead to their respective sections.

## ❖ Introduction section:

# INTRODUCTION

## INVESTMENTS

### What is Investments?

Investment is the employment of funds with the aim of getting return on it. In general terms, investment means the use of money in the hope of making more money. In finance, investment means the purchase of a financial product or other item of value with an expectation of favorable future returns.

In simple terms, The money you earn is partly spent and the rest saved for meeting future expenses. Instead of keeping the savings idle you may like to use savings in order to get return on it in the future. This is called Investment.

Investment of hard earned money is a crucial activity of every human being. Investment is the commitment of funds which have been saved from current consumption with the hope that some benefits will be received in future. Thus, it is a reward for waiting for money. Savings of the people are invested in assets depending on their risk and return demands.

Various investment options are available, offering differing risk-reward tradeoffs. An understanding of the core concepts and a thorough analysis of the options can help an investor create a portfolio that maximizes returns while minimizing risk exposure.

*Why should one invest?*

- To earn return on your idle resources
- To generate a specifi ed sum of money for a specific goal in life
- To make a provision for an uncertain future

*When to start Investing?*

The sooner one starts investing the better. By investing early you allow your investments more time to grow.

UNDERSTANDING STOCKS! HOME INTRODUCTION BASICS TIPS MAINTAINED BY

*The three golden rules for all investors are:*

- Invest early.
- Invest regularly.
- Invest for long term and not short term.

*There are three types of investment. They are:*

1. Bonds:

   When you buy a bond, you're lending money to a company or governmental entity, such as a city, state or nation. Bonds are issued for a set period of time during which interest payments are made to the bondholder. The amount of these payments depends on the interest rate established by the issuer of the bond when the bond is issued. This is called a coupon rate, which can be fixed or variable. At the end of the set period of time (maturity date), the bond issuer is required to repay the par, or face value, of the bond (the original loan amount).
2. Cash equivalent:

   Cash equivalent investments protect your original investment and let you have access to your money.They deliver a more stable rate of return. But cash equivalent investments aren't designed for long-term investment goals such as retirement.
3. Stocks:

   A stock is a financial instrument that represents ownership in a company or corporation and represents a proportionate claim on its assets (what it owns) and earnings (what it generates in profits). Stocks are also called shares or a company's equity.Investment returns and risks of stocks vary, depending on factors such as the economy, political scene, the company's performance and other stock market factors.Stock market is not a difficult subject to understand as you may think and anyone can learn how to trade stocks. There are many options available through which you can learn stock market basics. With sincere and persistent efforts, you can learn stock market.

   Read below to know more about stocks.

# KEY FINANCIAL INSTRUMENTS TRADED IN STOCK MARKET

**SHARES/EQUITY**

Equities or stocks or shares give you ownership of a company. You can buy or sell shares through a broker.Companies can raise equity capital with the help of an IPO by issuing new shares to the public or the existing shareholders can sell their shares to the public.

**MUTUAL FUNDS**

Here, the money is pooled from many investors and then invested in various financial instruments. Investors are referred to as unit holders. Profit generated is distributed to unit holders in proportion to the units held by them.

**BONDS**

These are fixed income instruments also known as debt instruments by which government or a company borrows money from investors at an agreed interest rate for a specific tenure. These are less risky when compared to shares.

**DERIVATIVES**

Derivative is a financial contract whose value is derived from an underlying asset. It can be used to mitigate a number of risks. Derivatives include forward, futures, options and swaps.

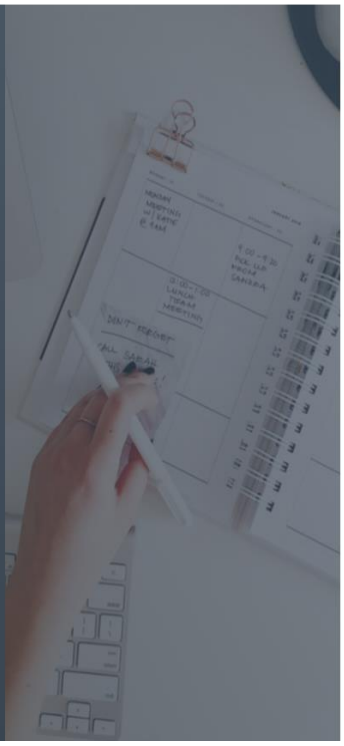
# SHARE MARKET BASICS

## What is stock?

- Stock is the share in the ownership of the company. Stock represents the claim on the company's assets and earnings. In other words, it means, the more the stock, the ownership stake in the company becomes greater.
- The stock is represented by a stock certificate which is a document that proves the ownership in the company.
- Few years ago when the person wanted to buy or sell shares, he/she physically took the certificates to the brokerage firm. But now information technology has increased, because of which this stock document is stored electronically. Now trading with a click of mouse or a phone call has made transacting easier.
- Another important feature of stock is its limited liability. It means as the owner of the stock, he/she is not responsible for the payments of the debts if the company is not able to. Owning stock means even if the company goes bankrupt, the owner of the stock will never lose his or her personal assets.



UNDERSTANDING STOCKS! HOME INTRODUCTION BASICS TIPS MAINTAINED BY

## Stock market

- A stock market is the aggregation of buyers and sellers of stocks (also called shares),which represent ownership claims on businesses.The reality is that investing in the stock market carries risk, but when approached in a disciplined manner, it is one of the most efficient ways to build up one's net worth.
- Individual and institutional investors come together on stock market to buy and sell shares in a public venue.
- Understanding the stock market is essential to making informed trading decisions. You need to know how to choose the right stocks, which requires an in-depth understanding of a company's current financial positions.
- Stock markets are really beneficial because:

i. You do not need a lot of money to start making money, unlike buying property and paying a monthly mortgage
ii. requires very minimal time to trade - unlike building a conventional business
iii. It's 'fast' cash and allows for quick liquidation
iv. It's easy to learn how to profit from the stock market.

UNDERSTANDING STOCKS! HOME INTRODUCTION BASICS TIPS MAINTAINED BY

## How to buy stocks?

i. Open demat and trading accounts. Without these two accounts, you cannot trade in the stock markets.
ii. Research and analyze the stocks you want to buy and select the ones that fit your investment profile.
iii. Once you have selected your stock, monitor it for a while. This is to ensure you buy at the lowest price possible in the near-term.
iv. Decide when you want to place your order – during market times or after markets. This depends on the share price you are targeting. If you want to buy a stock at a fixed price, and the stock closed at that price, place the order after markets. If you feel you are likely to get a lower price during market hours, place it when the market is open for trading.
v. Decide how many shares to buy be it a certain number of shares or be it filling your entire portfolio with a stock all at once. But consider starting really small to understand and get hold on the proceedings.
vi. Once you have decided the specifics of your order, you either go online to your trading account to place the order, or call your broker. Give your bank account details so that the purchase money can be deducted from your account.

## How to know when to buy,sell and hold stocks?

- Buying and selling stocks can sound exciting, complicated, and confusing all at once. But it doesn't have to be. The first step to understanding when to buy and sell stocks is knowing how a stock market works.
- The first thing to know: There isn't just one stock market—there are many stock exchanges and markets worldwide through which people buy and sell stocks, or shares of a company. Stock markets consist of lots of people buying and selling at different prices because they all have different ideas about those stocks' value.One investor might think a stock will go up, while another thinks it's going to go down.
- So who's right about when to buy stocks?
- The idea is to buy low and sell high: If you buy a stock for Rs.1 and sell it for Rs.2, then you've made a profit.
- For individuals looking to start investing, there are certain concepts to know:

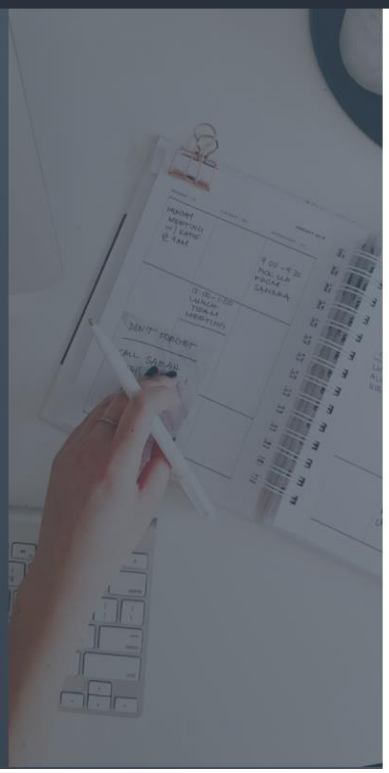
i. Diversify
ii. Start small
iii. Focus on overall investing and have long-term goals.

UNDERSTANDING STOCKS! HOME INTRODUCTION BASICS TIPS MAINTAINED BY

## BUYING STOCKS:

- When an investor has done their research and feels confident that a stock price will rise in the short or long term, and that they're willing to hold onto it until it does,that's the right time to buy a stock.
- While ultimately it can be a good idea to buy stocks across different industries in order to diversify, it sometimes helps to start with a business or industry one is familiar with.Knowing about the company can help put the earnings reports into context.
- Factors to consider when contemplating buying a stock:

i. The price range at which you're willing to buy.
ii. Does the stock appear undervalued?
iii. Does the stock offer dividends?



UNDERSTANDING STOCKS! HOME INTRODUCTION BASICS TIPS MAINTAINED BY

## SELLING STOCKS:

- Just as an investor can set a price range about when they want to buy a stock, they can also set a price range for when they want to sell. It pays to stay on top of the stock value—and when the valuation no longer justifies the price, it may just be time to sell.

The reasons to sell stocks might include:

i. A Loss of Faith in the Company:

An investor might have bought a stock with hopes of promising returns, or because the stock was reasonably priced when they bought it. But if it now appears that the tables have turned and the business fundamentals are on the decline due to competitions, declining profit margins,legal problems or questionable leadership.

ii. Opportunity Cost:

It is the concept of 'when you spend your money on one thing, you cannot spend your money on another. 'When you invest in one stock, you may not have the funds to invest in another. Therefore, an investor would want to evaluate every investment decision to determine if their money could potentially be more profitable elsewhere.

iii. The Stock is Overpriced

When comparing stocks, investors often use the price-to-earnings (P/E) ratio to value a stock. The higher the number, the higher the price is in comparison to the earnings of the company.

However, adding other data points may help investors decide if they are priced reasonably or overpriced. If the stock is overvalued for any reason, it may be time to reconsider the investment.

UNDERSTANDING STOCKS! HOME INTRODUCTION BASICS TIPS MAINTAINED BY

## HOLDING STOCKS:

- Knowing when to hold a stock often comes down to one's investment strategy. With a passive investment approach, investors invest in various stocks with the intention of holding them for an indefinite amount of time. This is also known as a buy and hold investment strategy.
- One benefit of the buy and hold strategy is that the tax rate on long-term capital gains (from stocks that an investor has owned for more than one year) are much lower than that of short-term capital gains.
- In general, if you buy a stock, you're going to want to hold onto it for a while. When an investor buys an undervalued stock, it could take a few years for it to reach its correct valuation. And of course, there's always a risk it will never reach what the investor has determined is the correct valuation.
- Not everyone holds onto their stocks for a long time, but there are risks to day trading—when people try to make trades up and down every day. Investors who do this often, lose money.

# SHARE MARKET TIPS

The stock market, when properly understood, can help you make a lot of money, but you can also lose all your money if you are tempted to invest randomly without knowing the nitty-gritty of the market.
Therefore, there are a few things you must know before you dive into the share market.
They are:

1. Never jump blindly into stock markets:
   You should invest in the stock market after getting the basic knowledge about it and in accordance with your financial goals.
2. Stock market is not a money-making machine:
   You must have heard the story about many investors who made their fortune through the market. Many believe that the stock market is like a money-making machine, which can turn them into millionaires over a period of time. Well, it is true that a lot of investors have made profits through the stock market. But it was only possible because they've good market knowledge, made some really smart choices by adopting carefully thought of strategies, and are also much disciplined in their approach.
3. Educate yourself, handle basics first:
   Before making your first investment, take the time to learn the basics about the stock market and the individual securities composing the market.
4. Invest only your surplus funds:
   The biggest mistake newbie investors make is to invest money that they can't actually afford to lose. Investing in the stock market is risky, and that means that you can potentially lose everything. Like any investment, there are inherent risks associated with the stock market.
   You need to decide your own risk tolerance considering your age, financial strength, retirement goal, etc, and accordingly should take the risk. If you want to take risk in the stock market, then only invest your surplus funds which you can afford to lose.
5. Avoid Leverage:
   Leverage simply means use of borrowed money to execute your stock market strategy. In a margin account, banks and brokerage firms can lend you money to buy stocks. It might sound great when the market is going up but when the market goes down and you incur loses, you would not only erode your initial investment, but you will also have to pay interest to the broker.
   Leverage is, thus, a tool, neither good nor bad. However, it is best used after you gain experience and confidence about your decision-making abilities.
6. Avoid herd mentality:
   You should avoid the herd mentality that is influenced by the actions of your acquaintances, neighbors or relatives without evaluating the current information and underlying stocks. Thus, if everybody around is investing in a particular stock, the tendency for potential investors is to do the same. But this strategy is bound to backfire in the long run if you have not chosen the stock by careful analysis
7. Diversify, but refrain from over diversification:
   Never put all your money in one stock. Create a well-diversified portfolio of stocks that can help you reduce the risk and save you from losing money if a few stock do not perform well
   Also, avoid over diversification, as increase in the number of stocks up to a certain limit do help in diversifying the risk proportionately, but beyond a certain number of stocks your investment can't get the proper growth moment.
8. Don't try to time the market, follow a disciplined investment approach:
   No one is able to successfully and consistently time the market by catching the tops and bottoms over multiple business or stock market cycles.
   Hence, it is prudent to have patience and follow a disciplined investment approach besides keeping a long-term broad picture in mind.
9. Don't let emotions impact your investment:
   Separate your emotion from any particular stock as many investors end losing money in the stock markets due to their inability to control emotions
   Do not invest in any speculative unknown stock lured by its past fabulous return without understanding the risk involved that will lead you to suffer loss.
   Learn to control your fear and don't panic and sell shares at rock-bottom prices.
10. Have realistic expectations:
    Hoping for the 'best' from your investments is not wrong, but you could be heading for trouble if your financial goals are based on unrealistic assumptions.
    If you feel that stocks in your portfolio are overvalued, it is better to switch to a relatively low value good stock.
11. Lastly, monitor your investment and review it periodically as any important event happening in any part of the world does have an impact on our financial markets.

# BENEFITS AND RISKS

### Benefits of investing in stocks

Over the years, several investors, no matter beginner or experienced, have gained significant profit by planning and investing in stocks. When an investor makes the right and correct decisions, there are higher chances of booking profits from those investments. After all, stock market is truly unpredictable. However, investing in stocks has several major benefits than other investments.

Few benefits are:

1. Smooth and Continuous Transactions

   An investor who buys a particular company's stock essentially means getting an ownership stake in that specific company. Thus, it will give the investors a feeling of ownership after purchasing stocks.

   They also receive annual learn reports to get detailed insights and learn more about the company. Owning a particular company's stock will be a way to express their loyalty towards a company and the business's success as a whole.
2. Diversification:

   Investors who put their hard-earned money into multiple types of investment, a stock market investment delivers a major advantage by providing diversification. The investments in the stock market change its value independently of other investments such as bonds and real estate.
3. Dividend Benefits:

   A dividend refers to a reward which the company gives to its investors. In simple words, it is an additional income of the company for investors that is paid yearly by every company. No matter if the stock has lost its value or representing profit coming from the stock, the dividend payments will arrive. Dividend income can help an investor to fund a retirement or pay for another investment to grow their portfolio over time.
4. Investment Gains:

   One of the major benefits of investing in the stock market is that investors get the chance to earn more money. Over time, if the stock market rises in value, the prices of a particular stock can rise or fall. However, investors who have put their money in stable companies will see profit growth. Likewise, investing in several different stocks will help investors build their wealth by leveraging growth in multiple sectors resulting in a profit.
5. Liquidity:

   Stocks are generally known as liquid assets because they can be easily converted to cash that consists of several buyers at any given point in time. However, when compared to other assets, it's more difficult to look for a buyer for some assets like property. However, in the case of stocks, its much easier because there are several buyers and sellers for each stock

### Risks of investing in stocks

Investing in the stock market is risky.Although historically speaking, stock market investment has given the best returns compared to gold, bond, funds or other options. However, the return from the market is not guaranteed and you may even lose your entire money in stocks.

A beginner who starts swimming knows that it's dangerous if he goes in the deep water before proper training. He knows that he might even get drawn in the water. However, when it comes to the stock market, people just ignore the different types of risks involved in stocks and are ready to dive in immediately.The types of risks involved in stock market are:

1. Market Risk:

   This is also called systematic risk and is based on the day-to-day price fluctuation in the market. The market indexgoes up and down throughout the day. And many a time, it may affect the returns from a stock. For example, if the market is going down at a time, then it might pull down the prices of even some good stocks.
2. Business Risk:

   The second type of stock risk comes from the business. This risk can be escalated if the business is not doing well. Reasons like the failure of management, poor quarter-by-quarter results, or your misjudgment in picking a company come under business risk.
3. Taxability Risk:

   The government changes taxes all the time and hence taxes may increase or decrease in the particular industry where you invested. The change in taxation can affect the stock price.

   Further, there are few industries that are taxed comparatively higher than others and hence, their net profit after tax may be less. Further, as taxation is controlled by the government, there is not much that the management or the investors can do.
4. Interest Rate Risk:

   The open market or global market interest rates changes from time to time. And this can positively or adversely affect the stocks depending on the direction in which the interest rate is moving. For example, when the interest rates are high, a company might find it difficult to borrow money (at high rates). Further, the bond market declines as the interest rate increases, which may also affect the corporate bonds.
5. Social and political risk:

   Many companies face problems due to social and political risks. For example, Tata Motors shifted its Tata-Nano plant from West-Bengal to Sanand- Gujarat because of political reasons, which cost a lot of money to Tata.
